

3rd July 2010

Dear Subscribers,

Below are this week's potential selections, subject to **official starting prices**. (Refer to Frequently Asked Questions for definition of "starting price").

Omit horses with SP lower than \$8-00, or higher than \$31-00.

If you are betting on the **TAB**, or with **betting agencies**, you may have to make some allowances. For example, longer priced horses often pay "overs" on the TAB.

If the selection's odds are close to the upper or lower limit, you should place your bet in the final few minutes before the horses jump, to ensure the selection's odds are within the allowable price range.
